The exact date you switch depends on the transmitter you are served by. To check when you switch, go to Digital UK's postcode checker on www.digitaluk.co.uk

Check your ITV news service or look at Teletext page 106 to see what TV region you're in.

Important information regarding the digital TV switchover

Television in the UK is going digital, bringing us all more choice and new services. Starting late 2007 and ending in 2012, television services in the UK will go completely digital, TV region by TV region.

## How the switchover affects your TV equipment.

Your new TV has a digital tuner built in, which means it is ready to receive the Freeview signal by simply connecting it into your aerial socket (you can check if you can get digital TV through your aerial now or whether you will have to wait until the switchover at www.digitaluk.co.uk)

When the TV switchover happens in your area, there are at least two occasions when you will need to re-tune your TV in order to continue receiving your existing TV channels and also to pick up new ones. Digital UK, the body leading the digital switchover, will advise you when you need to retune during the switchover.

How to retune.

Retuning your TV is a very quick and simple process. We recommend that you retune every few months to ensure you are receiving the very latest TV and radio channels that are broadcast.

- In digital/freeview mode, on the remote control press 'LCD menu' quickly followed by 8-8-8-8 (so press the number 8 four times)
- You will now enter the 'First time installation' mode. (if you do not, please refer to the section called 'getting started' later in this user guide)

First Time Installation

| Country | UK |
| Language | English |

Please ensure that the aerial is connected to the connector labelled ' RF In ' on the rear of the TV .Ensure that OK is highlighted in yellow and press 'OK' on your remote .If after this scan ,not all digital channels are found ,your aerial may require a signal booster .alternatively ,upgrade your aerial to a high gain digital version .

OK   Cancel

- Simply press 'OK' or 'Enter' on the remote control and your TV will retune.

If you do not retune your TV when advised to do so by Digital UK, you may lose some or all of your channels until you do re-tune.

If you are missing any channels, it may be that they are not available in your area, or that your TV aerial needs upgrading.

For help and support regarding the digital switchover, please contact Digital UK:

Telephone: 08456 50 50 50
Digital UK website: www.digitaluk.co.uk

If you require technical or warranty support on this television, please contact the manufacturer helpline, do not contact Digital UK unless your query is regarding the digital switchover.

Warnings

Caution
This television contains no user serviceable parts. Please refer to the manufacturer or authorised repair agent in the event of malfunction. Do not remove the back cover from the television.

Warning
To reduce the risk of fire, electric shock or damage to the television, do not expose it to dust, rain or moisture, or place any objects filled with liquids on or near the television.

Do not place the television in a confined space, ensure that nothing can obstruct the ventilation openings at the rear of the television.

Do not place naked flames on or near the television.

Dispose of this television and any components including batteries in an environmentally friendly manner. If in doubt, please contact your local authority for details of recycling.

Your LCD TV should be cleaned using a dry or slightly damp cloth. You should not use an alcohol based cleaner

Safety
For your safety, this appliance is fitted with a fused moulded 3 pin mains plug. Should the fuse need to be replaced, ensure that any replacement is of the same amperage and approved with the BSI mark. (⚑)

Never try and replace the mains plug unless you have adequate qualifications and are legally authorised to do so. In the event that a replacement Mains cable is required, contact the manufacturer for a suitable replacement.

Never use the television if it is damaged in any way.

Always place the television on a flat level surface avoiding anywhere which may be subject to strong vibration. Ensure the television is not placed on top of the power cable as the weight of the television may damage the cable and cause a safety hazard.

Never place mobile phones, speakers or any other device which may cause magnetic or radio interference with the television. If interference is apparent, move the device causing the interference away from the television.

Screen Burn

A characteristic of LCD TV Panels is that displaying the same image for a long
time may cause a permanent after - image to remain on the screen. This is called screen
burn. Most pictures shown on your TV will be constantly moving and fill the screen.

**Examples of images that you need to watch out for are as follows
(this is not an all-inclusive list):**

- **TV Channel Logos: e.g. Shopping channel logos and pricing displays-especially
  if they are bright and stationary. Moving or low-contrast graphics are less likely
  to cause ageing of the screen.**
- **Time Displays**
- **Teletext: Do not view a stationary page for long periods of time.**
- **TV/DVD Menus: e.g. Listings of DVD disk content.**
- **Pause Mode: Do not leave the TV in pause mode for long periods of time,
  e.g. When watching DVDs or videos.**

**Note: To prevent screen burn, if viewing any of the above for long periods of time,
reduce contrast and brightness when viewing. Once burn-in occurs it will never
disappear completely.**

How do I dispose of this product?

UK: Waste electrical products should not be disposed of with
household waste. Separate disposal facilities exist. For your nearest
facilities, please see www.recycle-more.co.uk or instore for details.

ROI: Produced after 13th August 2005. Waste electrical products
should not be disposed of with household waste. Please recycle
where facilities exist. Check with your Local Authority or retailer
for recycling advice.

What is included in the box

Accessories
Included with this TV are the following accessories:

1x - User Guide Book

1x - Remote control

1x - RF lead

2x - AAA batteries

1x - Quick Start Guide
1x - TV

1x - AC Mains lead
**4 x iPod Dock inserts to hold
your iPod safely in the iPod dock**

Getting Started - Initial Set Up

IMPORTANT - AFTER TUNING DO NOT PRESS ANY BUTTONS FOR 20 SECONDS SO THE CHANNEL INFORMATION CAN BE STORED.

TUNING IN
1) Using the RF Cable supplied, connect the TV to the TV Aerial socket (Fig A)
IMPORTANT: If your TV signal is inadequate to receive a good Digital signal, you will need to connect a 'Signal booster' between your TV and TV Aerial Socket. See section 5.

Fig A

Fig B
It is highly unlikely you will receive any/all of the digital channels using an indoor/portable TV aerial. You should use a Digital/Hi Gain outdoor aerial for optimum signal reception.

2) Connect the Power cable to your electrical outlet and the Television (Fig B above)
3) Switch on the television using the power switch located next to the DVD player
4) Insert the batteries supplied into the Remote control and press the Power/Standby button to power on the TV

You will now be welcomed with the initial set-up screen. Follow the on screen instructions:

5) A) Select country - default is UK
    B) Select language - default is English
    C) Ensure TV aerial is connected and press OK on the remote control to Tune in the Television
5) If the TV finds some but not all, of the Digital channels the TV is **functioning correctly** but the signal being received is not strong enough. (The signal strength needs to be above 85% - you can see the signal strength the TV is receiving when you change channels/ programmes) you will need to increase the signal strength in order to recieve all of the channels available. The most economical way to do this is by purchasing and connecting a 'signal booster' in between the TV and the TV aerial socket. If this does not solve the problem, you will need to upgrade the TV aerial to a digital hi-gain compatible aerial

Connect between TV and TV
Aerial socket
Signal Booster

Once you have connected a 'Signal booster' you will need to retune the TV in order to receive all of the channels.

Digital Teletext

Digital TV Teletext
With Digital TV (Freeview) there is also digital teletext available on some channels. Simply follow the on screen commands. Here is an example of the BBC digital teletext service.

1) To start digital teletext press the RED button (BBC channels) or the TEXT buttons (Other channels)

2) To select the information you require you can scroll using [∨] or [∧] and press [OK] alternatively you can key the page number for example [3][0][0] followed by [OK]

You can then navigate using the colours buttons (Red, Green, Yellow, Blue), the [∧] [∨] buttons and numbers.

If you wish to exit at anytime press [EXIT]

TV Mode Teletext Operation

Teletext is a service offered by some broadcasters.

Teletext Operation

1) Press [TEXT], after a few seconds teletext page 100 should appear.

Here is an example of BBC1

2) You can now navigate to the page you require in a number of ways:

    a) Press the page you require using the number buttons i.e. page 302, by
       pressing [3][0][2]
    b) Press the colour buttons, these will take you to the page indicated on screen
       for each colour

3) To exit Teletext press [TEXT] twice at any time

Other buttons

[SIZE] this increases or decreases the size of the text on screen
[INDEX] some pages are more than one page long this button displays the number of pages
[REVEAL] if there is an answer or something hidden this will display it
[SUBPAGE] displays the sub page if it exists
[HOLD] This stops the pages changing when there are multiple pages

Connect iPod to TV-Dock

1. Insert your iPod to the TV-dock on the sound base. The TV will detect the insertion of the iPod and automatically switch to iPod mode. You can also manually switch to iPod mode by pressing (iPOD) button or selecting "iPod" in the source menu.

2. Wait about 3-5 seconds while the screen displays a message "iPod connecting", and then the iPod Menu OSD will appear on the TV screen, and meanwhile the screen of iPod will change to the "OK to Disconnect" picture.

> iPod Connecting

If the TV screen continues to display the 'iPod Connecting' message for more than 20 seconds, its becuase the software/firmware on your iPod is not the latest version as released by Apple. Please refer to the trouble shooting section at the rear of this user guide or visit the helpline web site for details how to upgrade your iPod to the latest version.

3) The below menu will appear (This menu comes from the iPod so it may vary based on your settings on your iPod)

TV screen display

Changing Regions
This TV/DVD player is pre-set to play Region 2 DVDs. In the event you wish to use the TV/DVD in another country that uses different region discs, please visit www.skymediauk.co.uk.
Select 'product support', 'Changing Region'

Wall Mounting

WARNING
The speakers for this TV are built
into the base stand, therefore, the speaker
base <u>cannot</u> be removed. If you wish to wall mount,
only use the screws already provided in the
wallmounting holes. Using longer screws could
cause damage to internal parts.

THIS TV REQUIRES A CANTILEVER TYPE VESA 100 WALL MOUNT, OR EQUIVALENT

100

To provide improved sound this television has speakers built into the stand of the TV. The stand should therefore not be removed. For best performance the television should be put on a hard flat surface, however if you do wish to wall mount the television this can done using a cantilever type wall mount.

Wall Mounting the TV.

1) Remove the four screws highlighted below.

2) The wall mount can now be easily attached to the mounting holes on the rear of the TV. These holes are indicated in the picture below

Using with Sky Digital / Virgin Media

You may wish to use your TV with Sky Digital, Virgin Media or another cable or satellite box.

There are a number of connection options, the best being connecting via SCART cable.

Connecting via SCART

1) Connect the SCART cable from the cable/satellite box to the SCART Input on the TV
2) Press [SOURCE]
3) Press [V] or [/\] to select SCART
4) Press [OK]

The channel your cable/satellite box is displaying will now be shown on the TV.

You may wish to share your Sky Digital signal around the home by using an RF connection. If this TV is to be connected in this way, please follow the below.

Connecting via RF
Ensure the Sky signal is switched on, before you start the below.

1) Connect the RF cable from the RF output socket of the sky/cable box to the 'RF IN' of the TV.
2) Switch the TV into analogue TV mode
3) Press [MENU] to enter menu.
4) Press [>] twice to select Tuning Settings Menu
5) Press [V] to select Manual Tuning

TUNING SETTINGS MENU	
Country	UK
Auto Tuning	→
Manual Tuning	—
Program Edit	→
Common Interface	→

↔ Select ↓ Enter (MENU) Back (EXIT) Exit

6) Press [>] to enter Auto tuning
7) Press [OK] to start tuning

Once tuning is complete the first channel will appear. Press [CH+] to move through the channel until you find the Sky channel. The channel can then be moved to an alternative position if you wish, please refer to the Program Edit section of the manual.

Using a Sky / Universal Remote Control

USING WITH SKY DIGITAL REMOTE CONTROL (BSKYB) OR UNIVERSAL REMOTE CONTROL

You may wish to use your Sky Digital or a universal remote control to operate some of the functions of this TV. For this you require a 'code' that needs to be programmed into your Sky Digital or universal remote control.

For codes for universal remote controls, please visit our website where you will find the very latest information and codes.

For codes for Sky/Sky+Sky HD, please note that at the point of manufacture, BSkyB have not launched the code required for this model of TV. They are due to launch a new remote control which should include the necessary code to operate the functions of the TV during 2010 (called revision 9).

Please check our website for updates, alternatively, see below some alternative options of remote controls that are available.
One for All   Sky Originals

The One for All remote controls shown above will operate all of the functions of the Sky box in the same way the original remote control will, in addition, they will also operate the functions of this model of TV. The One for All versions are available to purchase from the helpline/website. The original Sky remote controls are shown for comparison purposes

If you require any further information, you can contact us:

www.skymediauk.co.uk
email - service@skymediauk.co.uk
Tel - 0871 2000 463

CONNECTING A GAMES CONSOLE

Connecting a games console can sometimes seem very difficult. We have simplified it to four options depending on the cables that you have.

Option 1 – Connecting via Scart to AV adapter

If you are supplied with a cable from the console which has YELLOW, RED & WHITE connectors you can connect via a SCART to AV adapter (Some console include this)
TV source should be set to SCART.
Option 2 - Connecting via Composite Video and Phono cables

If you are supplied with a cable from the console which has YELLOW, RED & WHITE connectors.

TV source should be set to Video

Option 3 – Connecting via HDMI cable

If you are supplied with a HDMI cable this is the easiest option. A HDMI cable can output both video and audio and enables you to enjoy digital-quality video and audio with minimal loss of picture quality.

TV Source should be set to HDMI.

Option 4 – Connecting via Component cable

If you are supplied with a cable from the console which has RED, GREEN, BLUE, RED & WHITE connectors you must connect via Component (for picture) and by 3.5mm to phono cable (for sound).

TV Source should be set to Component.

Frequently Asked Questions

Safety Warnings

Introducing the LCD TV

Installing the LCD TV

Using The Features

Troubleshooting
Specifications

Question:	Solution:
I have tuned in Digital TV but I am not receiving any or all of the channels and/or the channels I receive are breaking up	1) Check you are in an area that can receive Freeview. Visit www.freeview.co.uk or call 08701 111 270. 2) Check you are using an aerial that is able to receive a good digital signal. In most cases, you will need an outdoor digital hi-gain/wideband aerial. In areas that have excellent Freeview coverage, you may be able to use a loft type aerial but it is highly likely that you will also need to connect a booster between the back of the TV and the TV aerial wall socket. Unfortunately, to receive a good enough digital signal, it is not possible to use a portable/indoor type aerial. This may change once the analogue signal is switched off in 2012 and the Digital signal strength is increased.
I would like to connect an external amplifier	You require a 3.5mm audio cable to phono (Red & White connections), this can be connected into the rear of the TV stand and to the external amplifier
I have inserted a disc but it is not playing	1) Ensure you have inserted put the disc in facing the correct way forward 2) Ensure the disc is clean and is not scratched 3) Some copied discs will not play. 4) Check the DVD is a region 2 disc – to change the region of the DVD player, refer to section 'Changing Regions'.
I have connected the TV to my VCR via SCART but it is not recording	In addition to connecting via SCART, you should connect the aerial cable from the wall socket to VCR and another aerial cable from the VCR to the TV
I have inserted my iPod but the iPod menu is not being displayed (iPod Connecting remains on screen)	1) Remove the iPod from dock, switch off and then on both the iPod and television in turn. Then re-insert the iPod into the docking station. 2) Update the firmware on the iPod. a) Connect your computer to the Internet (if you have broadband, it's probably already connected). b) Connect your iPod to your computer. c) Go to Start | All Programs | iPod | iPod Updater 20xx-xx-xx (it'll have the date Apple released it in the title). d) Run iPod Updater. If you try to update your iPod's firmware and get an error message, chances are that means you need to go to apple.com/ipod/download and get the latest version of the iPod Updater software

If you experience any problems with this Television,
Please contact the helpline.

OPTIONAL ACCESSORIES AND SPARE PARTS

If you need to order replacement parts for your TV, please visit our web site or call the helpline.

If you wish to wall mount your TV, we have a range of fully tested and compatible wall mounts available to order from the helpline or via our web site.

If you wish to purchase a Sky or Sky+ remote control that includes the latest software/codes to operate both your Sky Box as well as this TV, these are available to order from the helpline or web site. Our Sky / Sky+ remote controls operate your Sky or Sky+ box in exactly the same way your current Sky / Sky+ remote does and our versions also look very similar to the Sky equivalent models, albeit slightly smaller in size, they will also operate many of your TV's functions including Power on/off, channel up/down, volume up/down as well as many other functions.
